Employment:

Retired from American Electric Power Service Corporation. Positions included Civil/Structural Engineer, Project Engineer and Project Manager involved in the design, repair and management of various components of coal fired power plants. Prior to AEP I was involved with many Civil Engineering projects including a potable water distribution system and the design of boat docks and shore protection for the Ohio Department of Natural Resources state park network.

Recent Memberships and Affiliations:

- Retired Professional Engineer in Ohio.
- Member of Madison County Hospital Keystone Society.
- Member and donor to the Columbus Zoo and the Franklin Park Conservatory.
- Served on the 2019 Madison County Comprehensive Land Use Plan committee.

Involvement in Choctaw Lake:

- CLPOA Board of Trustee member from 2017 – 2020.
- Current member of the Lake Water Quality Committee - Perform lake water testing, interpret test results, recommend lake water treatment options and coordinate treatment with the Lake Manager. Sub-committee member for lake dredging planning.
- Current member of the Drainage, Road and Dam committee – Assisting and using professional expertise in maintenance of roads, dam and drainage systems.
- Current member of Building Review Committee.
- Board of Director member for Choctaw Utilities 2017-2020. Currently involved as a technical advisor during the construction of the new water treatment facility.

Reasons for desiring board position; Challenges facing the association and how to deal with them:

My wife and I have been very blessed in our lives and firmly believe it is our obligation to serve in capacities where we have the talent and an ability to help. With my background in Civil Engineering I feel I can help maintain and improve the quality of our lake community in a fiscally responsible manner. My experience in business has provided me with project management and critical communication skills, both of which should provide a benefit in controlling costs and in prioritizing future work that is required around the lake.

I would like to work with the other members of the Board of Trustees to protect and promote the high quality of life at Choctaw Lake and also work with Lake Management to ensure the safety and proper functioning of our infrastructure. I look forward to providing technical assistance as our roads, dam, drainage and water systems age and require updates and repairs.
